BPO-Advantages

- Innovating the process, Process excellence, Adherence to deadlines strictly, BPO Provider-Range of BPO service.
- Substantial cost savings, in terms of both labour & capital

The concept of fully loaded cost is central to BPO. In many cases clients will only think of the cost of labour when attempting to establish the cost to the business of having Person X performing tasks A, B & C in-house. However, it is critical to factor in the costs associated with hardware, software, furniture, stationary, salary contributions, management, training and so forth in order to accurately understand the true cost of this person to the organization – i.e. the fully loaded cost. By partnering with a specialist BPO provider you eliminate the need to recruit & train new employees as well as cutting down on administration & HR management costs.

NPAF-CA, promotes GEA -Niro, Nano - Technology, Globally

Worldwide leader in spray drying and dryer technology.

No one knows more about the role of industrial spray drying than GEA Niro. GEA Niro has data gained from more than 70 years of experience and a reference list of some 10,000 plants across the globe. GEA -Niro has 30,000 test reports from their test centres, and they are equipped to engineer the properties you want into your products and the processes needed to produce them. NPAF-CA helps to identify, establish and facilitate logistics, regulatory, industrial yield and entry barriers of fresh and processed Life-science products, Globally.

1. Technology / production cost of end product.
